The Dermatology & Laser Center of Charleston was opened by Dr. Todd E. Schlesinger in July of 2005. Dr. Schlesinger, board certified and trained at the world-renowned Cleveland Clinic, brings 12 years of expertise in the care of skin, hair, and nails. Rebecca Repaire, PA-C, who joined the team in 2005, is a trained physician assistant also board certified in dermatology. Lori Wrightington, one of their clinical medical assistants is currently pursuing further education and certification as an esthetician, also joined Dr. Schlesinger in 2005. Dr. Schlesinger, Becky, and Lori have all been trained by Palomar Medical in the use of laser treatments for photorejuvenation, hair removal, skin tightening, spider veins and fractional resurfacing (pictured).

After becoming certified by the state as a CLIA Lab in October 2005, Dr. Schlesinger continues to utilize his expert training in Mohs micrographic surgery, designed to remove extreme types of skin cancer. In addition, plans for expansion are underway and the Medi Spa at the Dermatology & Laser Center of Charleston will be opening in early spring 2007.

Dermatology & Laser Center of Charleston specializes in the non-surgical rejuvenation of the aging face and body. Treatments such as photofacial rejuvenation, Botox, permanent hair reduction, skin tightening, fillers, facial volume restoration and laser resurfacing are all offered in a warm, professional and compassionate environment by a well-trained staff.

Dr. Schlesinger and staff invite you to partake in all the wonderful and effective treatments offered. If you are looking for a skin care regimen, you have come to the right place. Carefully selected, the professional skin care products chosen for you will help enhance your natural beauty as well as maintain the benefits gained from treatment.

Passionate and dedicated to its patients, the center is known for its ability to provide the most innovative and effective therapies for a wide range of skin conditions including rashes, moles, acne, warts, skin cancer, and sun damage. The office is located in the east medical building on the campus of Bon Secours St. Francis Hospital in West Ashley.
